Fall 2023
Exam 1

CSE 2050: Data Structures and Object-Oriented Design

9/29/2023

Name

Net ID

I swear that:

- This exam is solely my work
- I will not discuss this exam with anyone until all grades are posted
- I did not discuss this exam with any students who had already taken it beforehand

Signature: _____

Exam 1 Notes:

- Unless otherwise stated, assume Linked- and Doubly-Linked Lists include a tail pointer.
- We use the `print()` keyword `end` in some examples to specify a termination character besides the default newline (`\n`):

```
>>> print('hello'); print('goodbye')
```

```
hello
```

```
goodbye
```

```
>>> print('hello', end=', '); print('goodbye')
```

```
hello, goodbye
```

- Multiple answer questions (e.g. "Mark all that apply") will give partial credit for each correct answer you select. However, if you select an incorrect answer, you will receive no credit.
